

Creating Equations Review

Linear, Exponential, and Quadratic Equations

1. Find the Linear Equation that contains $(-4, 26)$ & $(5, -28)$.

2. Find the Exponential Equation that contains $(-1, \frac{5}{8})$ & $(5, 163840)$.

Quadratic on back →

3. Find the Quadratic Equation that contains $(-6, -193)$, $(-2, -41)$, & $(7, -167)$.
